

# Unlock New Revenue Streams & Strengthen Customer Engagement

Get the platform, resources, and opportunities to deliver your clients' GRC requirements and build trusted, long-term relationships with your customers.

Gain collaborative, innovative go-to-market solutions that increase your brand reach and strengthen your trust with your clients and potential clients.

## Who We Are

Since 2015, 3HUE's managed and professional services have positioned mid-market companies for Security and GRC excellence with end-to-end secure digital portfolio execution.

We empower SMEs to build resilient, efficient information-management practices—pinpointing process, technology, talent and security gaps, then working side-by-side with our clients to implement cost-effective, end-to-end solutions across the digital portfolio.

## Why Partner With Us

### Deep Industry Experience

Decades of cross-sector experience empower tailored, forward-thinking information management solutions that drive measurable behavior

### Unlock Revenue Streams

Another source of top-line revenue and additional products and solutions to complement your offerings and keep customers engaged!

### Seamless Partnership

As easy as a referral can be. No order entry, no heavy lift in the sales process, we make it easy to partner with us.

### Key Security Solutions

#### vCISO Services

Our security executives collaborate with your customers' CISO or Head of Information Security to drive decision making and oversee compliance initiatives.

#### Managed GRC Programs

From designing an Information Security Program, to establishing Control Baselines, to Tabletop Exercises, our Managed GRC programs start with strategy and end with continuous execution.

#### Risk Controls & Posture Assessment

Enhance your customers' control environment and provide remediation roadmaps with our comprehensive risk identification, threat landscape analysis, and NIST Cybersecurity framework gap analysis.

#### Audit Readiness

From SOC 2, HIPAA, ISO, PCI-DSS to many others, we will help your customers understand where they stand before an auditor does - and ensure their documentation aligns with regulatory standards.
